insects	seeds	underground	wriggly
---------	-------	-------------	---------

Last Sunday, my brother and I were in our backyard. We wanted to plant some (13) _____.

A (14) _____ earthworm appeared when we were digging a hole in the ground. As we dug deeper, we found many (15) _____.

Suddenly, a centipede crawled out from (16) _____. We screamed loudly for our parents. They rushed out of the house and helped us to get rid of it.

Section E: Punctuation (4 marks)

Fill in the blanks with the correct punctuation.

Yesterday, I brought my dog, Buddy, to the park. We saw many trees (17) flowers and people.

"Stay, Buddy (18) " I said softly.

Buddy sat down and I threw a ball as far as I could for him to fetch.

"Here is a treat for you, (19) I said as I fed him his treat.

Suddenly, a cat appeared. Buddy chased it and disappeared from sight. "Did you see a brown dog chasing a cat () "

I asked a lady.

The lady replied, (21) Yes, I saw a dog chasing a cat near the big old tree." I quickly ran towards the tree (22) I saw Buddy barking loudly at the cat that had climbed up the tree. I ran towards them.

"Do not run off without me again (23) " I screamed at Buddy loudly.

After playing for a long time (24) we headed home for dinner. We had a wonderful day at the park.

Section F: Comprehension (10 marks)

Read the passage carefully and answer the questions that follow.

There are about twenty thousand different types of butterflies all over the world. Butterflies go through a life cycle. There are four stages. It starts off as an egg. A female butterfly lays eggs on leaves.

The second stage is the caterpillar, also known as the larva stage. It takes about five days for the eggs to hatch into caterpillars. A caterpillar will eat leaves all day until it is fully grown.

5

The pupa stage, which is the third stage, starts once the caterpillar is fully grown. The caterpillar will hang itself on a branch and change into a chrysalis. It is also called a pupa. It will remain in the cocoon for about two weeks. Then it will be ready to become a butterfly.

10

When the caterpillar turns into a butterfly, the fourth stage of its life cycle starts. It will fly to flowers to sip nectar. It will also lay eggs and the life cycle of the butterfly will begin all over again.

15

(adapted from:

http://www3.canisius.edu/~grandem/butterflylifecycle/The_Lifecycle_of_a_Butterfly_print.html)

Write the number for the correct answer in the brackets. (2 marks)

25. The eggs of the butterfly are found on the _____.
